

## Environmental policy

Addvanze AB shall develop, manufacture and market products and services that have a minimal environmental impact, taking into account our financial situation, technical possibilities and fulfilment of statutory requirements.

Our impact on the environment must be reduced or eliminated by choosing sustainable alternatives when choosing raw materials, products, services and contractors. We will sort and recycle materials. We will also:

- Constantly keep environmental issues current by making the follow-up of our environmental performance easily accessible to our stakeholders.
- Seek or develop and introduce methods or processes to reduce our energy consumption.
- Seek or develop and introduce methods or processes to reduce our impact on the environment.
- Constantly improve our processes to become more efficient from an environmental point of view.
- Constantly improve the environmental management system to achieve better environmental performance.
- Increase the awareness and commitment of our staff through training in environmental issues.
